

ENGAGE:Travel– Unlocking Revenue

Engage:Travel is a powerful tool specifically designed to meet the varied communication and connectivity needs of the travel industry:

- Engage can control and enable all data transfers associated with direct booking; indirect booking; content management; dynamic packaging; holiday aggregation and affiliate and partner marketing.
- Engage will allow the simple addition or alteration to internal or external data feeds, removing delay when adding new partners or third parties; allowing you immediate realisation of revenues.
- Engage will allow consolidation of disparate data sources into one single data feed or database, or produce multiple data streams from a single data source, enabling automation of all inter and intra-company business processes.
- Engage is fully automated and can be scheduled to run as frequently as required.
- Engage has full compliance, audit and MIS reporting functions.
